Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
 - If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
 - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
 - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-14 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 1, lines 5 and 6, the recitation "for each said chamber, two feed lines" is inaccurate since each chamber has only one feed line. To correct this, the recitation "two feed lines for feeding said fluid to and from the chamber respectively," in lines 6 and 7 should be corrected to --a feed line for feeding said fluid to a chamber and a feed line for removing said fluid from a chamber, respectively,--.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Aardema *et al.*

Note Figs. 6 and 4, and particularly Fig. 6 showing cylinders 660.14, chambers 660.12, 660.16, lines (unnumbered) and valves (unnumbered).

Art Unit: 3671

Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Eysymontt.

Note Fig. 1 showing cylinders *A, C*, chambers (unnumbered), lines *A7, A6, C7, C6* and valves *A16, A17, C16, C17*.

Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Penso.

Note Fig. 7 showing cylinders 140a, 141a, chambers (unnumbered), lines 160 and valves 162.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 2 is rejected under 35 U.S.C. 103(a) as being unpatentable over Aardema *et al.*, Eysymontt or Penso in view of Nishikimi *et al.*

Aardema *et al.*, Eysymontt or Penso show the device as noted.

Claim 2 distinguishes over Aardema *et al.*, Eysymontt or Penso in requiring each valve to be a proportional electromagnetic valve.

Nishikimi *et al.* disclose in col. 2, line 39 "electromagnetic valves 6 and 8".

It would have been obvious to one of ordinary skill in the art at the time the invention was made to have utilized proportional electromagnetic valves as disclosed in Nishikimi *et al.* in place of the valves of Aardema *et al.*, Eysymontt or Penso for economy in manufacture.

Allowable Subject Matter

Claims 3-14 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.
